EDUCATION

I am currently a 3rd-year Software Development student at Yeditepe University (24 years old), starting in 2023. Throughout my studies, I have completed a range of core courses that have provided me with a strong foundation in both theoretical and practical aspects of software engineering. These include Data Structures and Algorithms, Database Systems, Object-Oriented Programming, Design Patterns, Structural Programming, Computer Networking, Software Development Process, as well as web development fundamentals such as JavaScript, HTML, and CSS.

PROJECTS

Quiz Gam

Developed a Quiz Game using JavaScript as an individual project, handling both design and full implementation. The game includes categorized questions and answer evaluation logic to control game flow.

Software Development Process

Contributed to a group project on the Software Development Process by designing the system structure and creating the UI/UX in Figma, focusing on usability and clean interface design.

SKILLS

Programming:
Python, C, C#, JavaScript
Backend (general mention)
Databases
Networking
HTML, CSS
Design Tools: Figma
